

**A Summer Adventure**  
or  
**Recovering the Statue of Bastet**  
a Tomb Raider custom level created by  
**mugs**

**Preface:**

This is a Tomb Raider custom level set built by mugs (Pat Chancey). It was mostly done in 2015 already, but never got released because during beta-testing, most of the files were lost in a hard drive crash. Pat passed away in August 2017. She never got to release this game herself.

A number of people have made an effort to see mugs' game released in her memory. Firstly, Pat's sister Carol and her son were kind enough to send the new hard drive over to Germany, so I could see if there were any unfinished projects on it. Shortly thereafter, Gerty sent me the beta files to this game from the test version. Eddy helped me modify the exe file and fix a sound problem. DJ Full helped a great deal in sorting out the wad files so I could use them in TRNG. He also gave me a lot of advice and support concerning the title sequence to this game. The result you see is a fixed version of Pat's original game with an added title sequence.

I am glad I got to know her, and hope people will think of her once in a while playing this game.

I know I will.
