

## Christmas in Venice II

16.12.2007

For Lara's Levelbase Advent calendar

[nick78stgt@yahoo.de](mailto:nick78stgt@yahoo.de)

Many thanks for downloading this level.

This is a peaceful level for the LB Advent calendar 2007.

For questions, ideas or comments on the game, contact me via e-mail oder write a review on TRLE.net (English) or [laraslevelbase.org](http://laraslevelbase.org) (German) .

Happy Raiding!

---

### Advice to the game

- All together, there are three secrets to find.
- Unfortunately, the use of the motor boat is impossible because of technical reasons.
- The lightning of flares and other flames (e.g. open fires or christmas trees) is not necessary to continue the game.
- The tomb4.exe attached to the download enables unlimited view distance while playing. However, you can also play without it if you want or if you play on a Mac.

---

### Credits

Many thanks to the testers *Zickenalarm*, *Codo*, *Eva* and *CuahianoSmall* for a detailed test on the level as well as Clara for technical support. Also thanks to Miss Kroft for her level "Christmas in Venice" and her permission to build a new level under this name.

#### Objects

*Spongebob*

*Miss Kroft*

*TifaNazah*

#### Outfit

*PoYu Chen*

This level is an unofficial fanmade custom level. It was not made and is not supported by Core Design Ltd. and Eidos Interactive.

### Installation

To play this level, the Tomb Raider Level Editor is required. You can download it on [www.laraslevelbase.org](http://www.laraslevelbase.org). Please save the files you have to replace within the following steps.

1. Folder **audio**: Convert all audio files from mp3 to wav. To do so, you can use the tool called startme.exe. Copy all wav files into the audio folder of your Level Editor.
2. Folder **data**: Copy the files located in this folder into the data folder of your Level Editor.
3. Copy **SCRIPT.DAT**, **ENGLISH.DAT** or **GERMAN.DAT** into the main folder of your Level Editor, in which tomb4.exe must also be located. If you want to play in German, **ENGLISH.DAT** must be deleted from the main folder.
4. **tomb4.exe**: Replace the existing tomb4.exe with the new one. If you play on a Mac, leave this step out.
