

### Story:

Like Indiana Jones before Lara wants to find the legendary Ark of the Covenant mentioned in the Bible and commissioned by God in order to keep the 10 Commandments.

In Solomon's time the Ark was kept in the first Jewish temple on the Temple Mount in Jerusalem. But since the temple had been destroyed by the Babylonians the Ark of the Covenant has been supposed to be lost.

Lara and Zip start their trip to the Negev Desert where they want to find the mysterious loom Lara's deceased colleague Aaron Wessely had mentioned in his diary. This loom is said to weave flying carpets to travel into the past ...

It is recommended to play the prologue of this level before:

### Special features

Lara will have to talk to several people – either to get information or items. In order to do so move her to the person and press CTRL to start a conversation.

Lara can do a crawlspace jump by pressing ALT.

Lara regularly gets hints in her diary. The diary can be used for saving/loading and of course it can be read.:o)

Using the TAB-key the diary opens directly.

You cannot take the burning\_torch\_item (torch/branch) to another level. Lara will throw it away before.

**Caution:** After returning to the level thrown-away burning\_torch\_items will have disappeared!

### Known bugs:

Sometimes Lara does not climb around corners at a ladder. In this case please start to jump again. That's why you should save your game before jumping at a ladder.

In some levels the flames of thrown-away burning\_torch\_items (torch/branch) disappear. These flames might appear at unusual places, but they don't harm Lara.

### Important installation instructions:

No installation required!

You only have to run the tomb4.exe in the main folder of the level.

If you want to listen to the dialogues in German, open the folder "deutsch" within the folder "audio" and copy these ogg files into the main audio folder to overwrite the English ogg files.

It is not possible to play this level on MAC, alas.
