

Gabriel Croft
TOMB RAIDER SALVATION
2012-2016

Story

One mysterious cult learned about five powerful artifacts that were hidden around the world. They intend to use them for evil purposes. Now, Lara must race against time to find the objects before the cult members, to destroy them and save the world.

Part 1: Prologue

To start her adventure, Lara must travel to an island nearby Coastal Thailand, the place that might hide one of the artifacts. But she lost her keys to the main manor gates...

Part 2: Treasure Island

Rumors about one of the artifacts continue spreading and it is believed that it is located somewhere in an island nearby Coastal Thailand. Starting this new adventure, Lara jumps of her helicopter and slides inside the jungle.

Part 3: Into The Depths

After recovering one of the artifacts, Lara escapes the island with a ship provided by a friend. She takes her time to take a breath and rest. Reading a journal that her friend found recently in India, our heroine discovers that a luxury ship, the Queen Athena, wrecked somewhere in the south pacific ocean, near the ruins of a sunken ancient city. The ship was carrying on e of the artifacts, but since it wrecked, it was never found. The legend says that the artifact itself caused the wreckage, since someone used its intense power without care. Without anymore time to rest, Lara tells her friend to go right to the pacific ocean. Arriving there, she dives into the sea ready to explore the depths.

Part 4: Penglai Shan

Escaping the Queen Athena, Lara Croft found one more mercenary, a member of the cult. She forced him to tell her anything that he knows about more artifacts. He showed to Lara the coordinates that the cult discovered for the next piece: it leads to Penglai Shan, the hidden island that was supposed to be a Chinese mythology, hidden until now.

Part 5: The Shard

After days searching for more clues, Lara finally discovers that one powerful ninja from Paris recovered one artifact from South America, and she is hiding it inside her skyscraper to gain power for herself. The objective is to infiltrate The Shard and recover this artifact.

Part 6: Mexico

After combining all the five elements, she will be finally able to destroy the mystic objects to save the world. Escaping with the fourth artifact, Lara discovers that members of the cult are searching for a lost city in Sonora Desert, located in Mexico. That's probably guarding the last and most powerful artifact. Lara Croft is almost sure that the ancient city is El Dorado.

Vehicles

Sometimes Lara won't be able to go further by her own. She will use a boat to go through the wild river rapids and a motorbike to jump to another building.

Note: Secrets

Part 1: 3 secrets

Part 2: 3 secrets per level (9 in total)

Part 3: 3 secrets per level (6 in total)

Part 4: 2 secrets

Part 5: 4 secrets

Part 6: 2 secrets (1 per level)

Note: Caution

-Don't save when pressing switches or inserting key items into their places or else game will not work properly.

-Do not modify any folder/archive inside the game folder or else game might not work properly.

Sorry if I forgot to mention someone... thanks for helping me with the game.

Special Thanks

For you, supporting my project for all these years, and playing it.

Thanks for you who record gameplays to upload in YouTube. Believe me, I watch every single video.

For TombRaiderForums members and players, always helping me and saying kind words that give me motivation to keep building TRLE levels.

For CORE DESIGN and EIDOS, who gave us the wonderful level editor and tomb raider, of course.

See you in the next project!
