

TOMB RAIDER

ABOVE THE HORIZON

Created by Max (aka maax87)

ver 1.1 / 2019

DEMO

STORY:

Lara has been captured and imprisoned by an hostile NOVA organization. It demands information about Tori's whereabouts. She is Lara's only friend. The enemy is really determined. Luckily, in the same time rebels attacked Nova building. This is Lara's only chance to get out and find Tori. Explore secrets of the Metropolis city and meet people, who live under oppression of the Nova organization.

DEMO:

This is only a DEMO version of the game with two first levels included. Prologue is an introduction to the game universe and new mechanics. In DEMO version there are a few limits because there still work in progress.

Prologue is an introduction and tutorial at the same time. You can start either of the two levels. You should start with the first level. In the second level you can choose one of the two quests. If you want to check both quests you just need to play second level - Shelter again.

INSTALATION:

No installation required. Unzip the downloaded folder and click the TRATH.exe to start the game.

INFORMATIONS AND PROBLEMS:

- 1). I suggest to play in darkened room or at night for better experience.
- 2). Please set volumes of audio and sfx in options at 100%.
- 3). When you launch TRATH.exe press CTRL key to view setting list. Select 'VOLUMETRIC FX'.
- 4). This game use a **FLEP** mode. **Some antivirus programs identify the exe file as a threat (false positive alert)**. The solution is to add the exe file to the ignore list antivirus program. I do not recommend to replace exe file to another tomb raider 4 (tomb4.exe), because it could cause crashes and visuals problems.

You can read more about this problem here:

<http://forum.trle.net/viewtopic.php?t=30357>

CREDITS:

Level Designer: Max (aka Maax87)

Objects, Animations and Textures: Max (aka Maax87)
