

# ALDWYCH ADVENTURE

## A Tomb Raider 3 Custom Level

### STORY:

Lara is away for the weekend in London at a society event and Winston has the weekend off as well to visit friends. As Croft Manor is unoccupied, some criminals break in and steal the "Acosian Disc" a priceless and unique artefact with reputedly mystical powers that apparently allows the user to manipulate the forces of fire. Lara naturally calls the police but they have no leads, so Lara contacts some of her acquaintances in the 'underworld' and they come up with the "London Storage Company" which is a front for a criminal organisation. Further enquires suggest that their headquarters is near the abandoned underground station called Aldwych and the gang's boss is holed up underneath the station. Therefore Lara travels up to London to confront the gang and hopefully retrieve her stolen artefact.

### SECRETS:

There are 6 secrets to find.

### DISCLAIMER:

This unofficial level was not made by and is not supported by Eidos or Core Design. Tomb Raider III is © & TM Core Design Limited 1998. © & published by Eidos Interactive Limited. All Rights Reserved.

### PLAYING:

This custom level has been built using the TR3 engine, so Lara will only have the controls, moves and actions that featured in TR3. This level should run straight from the unzipped folder by clicking the "tomb3" file, but if it does not, or you get problems, try deleting the "config" file or run the "setup" batch file. You may also need to set "compatibility" mode in Windows. There are a few minor bugs that couldn't be corrected, but they don't affect the game play. If you find the game too dark you can adjust the gamma setting. It is set at 3 by default.
