

STAR WARS THEED UNDER SIEGE

Please respect the work behind this game and do NOT rip ANYTHING from it.

- ANTIVIRUS WARNING -

Because of an unofficial patch (TREP) applied during level building, antivirus software and Windows Defender will detect tomb4.exe as virus, or even worse, will delete it without even advising.

But I can grant you all the detections about that are false positives!

To bypass this issue, add the tomb4.exe process to the exception list of Windows Defender and your other antivirus software.

For more detailed information, check the following thread on trle.net:

- BLACKSCREEN WARNING -

If you play in full screen mode you have to install the borderless window fix, otherwise you might get a blackscreen when launching the game.

If you play in windowed mode you can ignore this warning.
