INFO

This level was created for Deseo's competition. It's basically an assault course that takes place in five different surroundings. The objective is to finish it the fastest you can. The crystals show you the path, so it's clearer where to go. Saving is available, so you can save wherever you want to. Feel free to share your personal best time.

The creation process of the level lasted from the end of March 2026 till the beginning of September 2026.
